Algebraic Topology: A Computational Approach

T. Kaczynski
University of Marburg
K. Mischaikow
Georgia Institute of Technology
M. Mrozek
Jagiellonian University
April 18, 2009

Abstract
This book is a first course in algebraic topology. It is designed for students who have completed a first course in linear algebra and a first course in topology. The book covers the basic concepts and results of algebraic topology, including homotopy, homology, and cohomology. It also includes applications to geometry and physics.

(Login options control institutional or personal access. Content can request the purchase if you do not have access.) William Fulton Here are some photos that my son did to me and a friend. Well, this and this are more precise ... here is a curriculum. Hebrew curves, an introduction to algebraic geometry This is a slightly modified version of the 1969 text, which has remained out of print for many years. Is based on a LATEX version of Kwankyu Lee. Since I hold the author's rights, I am pleased to put it available online, for free, to all interested parties. CurveBook.pdf StackstThis is a draft parts of a book, and at the same time notes for a course. The old parts will be revised as the new parts are added, so it doesn't make sense to download anything now for a vague future use. Please consult the preface for more information on the book. Comments are welcome (via e-mail). For more information on the future book (?). And a more recent version of these, see Andrew Kresch's homepage. Title. Title.10.19.04.pdf Preface. Preface.10.19.04.pdf Contents. Index.10.19.04.pdf Chapter 1. Introduction. Chapterintro.10.19.04.pdf Bibliography. Bibliography.10.19.04.pdf wfulton@umich.edu for homonymous items see Fulton. This article is a draft concerning a mathematician. You can share your knowledge (how?) according to the recommendations of the corresponding projects. William Fulton William Fulton in 2006 in Oberwolfach.Key data Birth 29 August 1939 1939 (Connecticut) Nationality Institutions of Mathematics University of Michigan University of Chicago University Princeton Universities Distinctions Steele Extension (1996) Price Steele Career (2010) Modify William Edgar Fulton (No) © In 1939) He is a mathematical American, specialist in algebraic. Fulton got his BA from the university © Brown in 1961, supervised by Gerard Washnitz (DE) and advised by John Mhler, John Coleman Moore and Goro Shimura, his doctorate in Princeton in 1966. He worked at Princeton and Brandeis University from 1965 to 1970, then they started teaching in brown. In the 1987's he gained a position at the University of Chicago [1]. Since 1998 he was a professor at the University of Michigan [2]. Fulton is celebrated as author or co-author of many booking books, such as algebraic curves and representation theory. In the 1970s, he worked with Robert Macpherson and Paul Baum on the theory of the intersection (EN) of algebraic varieties. In the 1996, he received the "Steele Price for Mathematical Extension" for his book intersection theory [1]. Fulton was Guggenheim with the 1980s-81. He is a member of the National Academe of Sciences of the United States and American Acaday of Arts and Sciences and was a member of the Swedish Royal Acada in the 21st century. In 2010 he received the Priceee Prize for his entire career [3]. Selection of publications (IT) Algebraic curves: an introduction to algebraic geometry [estimate] Intersection theory, Springer, Coll.
