Covering almost all genres, the movie is definitely too much but very entertaining. You've got zombies (even though they're not really threatening and seem more like a tool to advance the plot), you've got crazy car chases, you've got crazy savages benefiting from the purge, you've got a pinch of comedy and a whole lot of soap opera drama. At one point I convinced myself that the characters would be dancing in Bollywood! While Train to Busan was an exciting film and focused on the characters, The Peninsula is a wild and full-on film that has almost nothing in common with the first. This would have been perfectly integrated into the Zombieland universe and the notes here would have been much better. In other words, it's a bad movie if you're waiting for Busan's suite, but a good Zombieland 3. When it comes to the plot involving the peninsula, it leaves even more unanswered questions. If you recall the background of the characters or certain details about the story, you will notice many inconsistencies, plot holes and ambiguities. However, this movie doesn't care about you, so don't take it seriously, don't expect too much and don't use it.
