Cefuroxime for Empiric Treatment of Community-Acquired Pneumococcal Pneumonia: Is There a Generation Gap?

- Objetivo: Comparar los resultados en pacientes adultos hospitalizados que tenían Neumonia por neumococo y bacteremia asociada por cepas con MICs a penicilina de 60,12 g/ml (resistentes y resistencia intermedia) con los resultados e los pacientes que tenían cepas sensibles.
- Métodos: El estudios se llevo a cabo en hospital Universitario de Jerusalén. Parte clínica -> Estudios retrospectivo de casos y controles.

Wiener-Well, Y., Raveh, D., Schlesinger, Y., Yinnon, A. M., & Rudensky, B. (2009). Ceturoxime for empiric treatment of community-acquired pneumococcal pneumonia: is there a generation gap? Chemotherapy, 55(2), 97-104.

1.6 Estreptococo pneumoniae		
1.6.1 Penicilino sensible	Penicilina G o V, amoxicilina	Cefalosporina (G1), macrolido, clindamicina, trimetoprim- sulfa
1.6.2 Penicilino resistente	Ceftriazone o cefotaxina	Clindamicina, quinolona (G+) trimetroprim – sulfa, meropenem, tigeciclina
2. Cocos Gram Negativos		
2.1 Moxarella catarrhalis	Amoxicilina+ acido clavulanico o ampicilina+ sulbactam, trimetropim+ sulfa	Cefalosporina (G1, G2), ciprofloxacina, macrolido
2.2 Neisseria gonorrhoeae (Gonococo)	Ceftriaxona, cefixime, ciprofloxacina o levofloxacina	Cefoxitina, doxicilina, espectonomicina
2.3 Neisseria meningitidis (Meningococo)	Penicilina G	Ceftriaxona o cefataxime, clorafenicol, meropenem

Microorganismos	Enfermedad habitual	Agente de elección	Alternativas
Actinobacillus Actinomicetem- comitans	Actinomico sis.	Penicilinas. Penicilina+ aminoglucósido	Clindamicina Teraciclinas Eritromicina Cefalosporinas Cefalosporinas+ aminoglucósido

amending the RDC 20/211 presents a temporary justification for exempting the retention of the issuer of the revenue MAfA © A © provided for Article 24 of the RDC in question which designates the competent Terma of ANVISA the adoption of measures or procedures for non-cases \hat{f} at \hat{f} and \hat{f} are \hat{f} at \hat{f} and \hat{f} and \hat{f} are \hat{f} at \hat{f} and \hat{f} are \hat{f} and \hat{f} and \hat{f} are \hat{f} are \hat{f} and \hat{f} contains the patient's age and sex data, they may be fulfilled by the pharmacist responsible for the dispensation. Therefore, this procedure ensures patient access to the drug and treatment and does not carry any sanitous prejunction, considering that the inclusion of age and sex data in the Recipe aims at improving the monitoring of the pharmacoepidemiolon profile of the use of these medicinal products in the country, to be carried out through the Scripture of these data in the national system of managing controlled products in the country, to be carried out through the Scripture of these data in the national system of managing controlled products in the country, to be carried out through the Scripture of these data in the national system of managing controlled products in the country, to be carried out through the Scripture of these data in the national system of managing controlled products in the country, to be carried out through the Scripture of these data in the national system of managing controlled products in the country, to be carried out through the Scripture of these data in the national system of managing controlled products in the country, to be carried out through the Scripture of these data in the national system of managing controlled products in the country, to be carried out through the Scripture of these data in the national system of managing controlled products in the country, to be carried out through the Scripture of these data in the national system of managing controlled products in the country, to be carried out through the Scripture of the second products in the country of the second products in the dog or a simple first-way dog, not being obliged to sign up. In the case of revenues presented and not identified, if deemed necessary, the pharmacist responsible may identify as the first journey of each of the presented and not identified, if deemed necessary, the pharmacist responsible may identify as the first journey of each of the presented and not identified, if deemed necessary, the pharmacist responsible may identify as the first journey of each of the presented and not identified, if deemed necessary, the pharmacist responsible may identify as the first journey of each of the presented in two non-carbonated and not identified, if deemed necessary, the pharmacist responsible may identify as the first journey of each of the presented in two non-carbonated and not identified, if deemed necessary, the pharmacist responsible may identify as the first journey of each of the presented in two non-carbonated and not identified, if deemed necessary, the pharmacist responsible may identify as the first journey of each of the presented in two non-carbonated and not identified as the first journey of each of the pharmacist responsible may identify as the first journey of each of the pharmacist responsible may identify as the first journey of each of the pharmacist responsible may identify as the first journey of each of the pharmacist responsible may identify as the pharmacist responsible may identify as the first journey of each of the pharmacist responsible may identify as the first journey of each of the pharmacist responsible may identify as the first journey of each of the pharmacist responsible may identify as the first journey of each of the pharmacist responsible may identify as the first journey of each of the pharmacist responsible may identify as the first journey of each of the pharmacist responsible may identify as the pharmacist re make a screen of the carbonated pathway, which will be held together with the carbonated route for the purposes of supervision. 3. The amount dispensed with is that the DRC is not 20/2011 determines that the dispensation should dispense with the quantity exactly prescribed for treatment, and for that purpose use may be made of a fractional commercial presentation according to DRC No 80/2006 (fractional medicines). In cases where it is not possible to dispense the exact quantity on the grounds that there is no market presentation of a medicinal product with the appropriate amount of treatment, The preference should be given to dispense with more than the prescribed quantity in order to promote complete treatment to the patient. Thus, due to the scarcity of medicinal products on the Brazilian market that can meet the prescribed posology, this conduct will promote a better relationship between the patient and society. The dispensation in a higher quantity should only be performed in strictly necessary cases, since this procedure entails an excess of medicines for the patient, raising the risk of self-medication, as well as generating consequences in relation to the disposal of medicines for the patient, raising the risk of self-medication, as well as generating consequences in relation to the disposal of medicines for the patient, raising the risk of self-medication, as well as generating consequences in relation to the disposal of medicines for the patient, raising the risk of self-medication, as well as generating consequences in relation to the disposal of medicines for the patient, raising the risk of self-medication, as well as generating consequences in relation to the disposal of medicines for the patient, raising the risk of self-medication, as well as generating consequences in relation to the disposal of medicines for the patient, raising the risk of self-medication, as well as generating consequences in relation to the disposal of medicines for the patient of th inefficiency of treatment and will certainly contribute to increased to the drug and impaired patient health. 4. From care in establishments other than one different antimicrobial drug, you are left with the dispensation of part of the prescription, if the drugstore and with the endorsement of the patient/responsible not containing in its stock all the medicines contained in the prescription. In these cases, the first care should be ate on the front (obverse) part of both routes of the prescription, with the only descriptive of the medicine(s) actually dispensed. With the first route in hand, the patient can look for another facility to acquire the remaining medication(s), and the pharmaceutical or the procedure is © also © for cases in which the patient can obtain only part of the drugs in the public sector and needs to acquire the remaining synchronized in private episodics/drugstore. 1 Copying the prescription drug that cannot be dispensed/purchased in a single public and/or private establishment. Otherwise, the recipe should always contain two ways as described in Article 5 of Chapter III. 5. From the remote dispensation The RDC no 20/2011 is rdc in the 44/2009 (Good Pharmaceutical Practices) with regard to the sale by remote means. Thus, what governs the DRC in 44/2009 should be followed. The appropriate way © the prescription be withdrawn in the patient's home and checked by the pharmaceutical in the intention/drugstore. If the legalized intention, the service must be atteed (stamp), retained the second way and then thecan be carried out. Articles 52 (dispensation) 56 (transportation) and 58 (direct information and guidance on use) of RDC No. 44/2009 must be followed. 6. than described on the packaging or that the product has strange characteristics, characteri 20/2011, in situations of prolonged treatment the revenue may be used for subsequent acquisitions within a period of 90 (ninety) days from the date of their time of departure. use, with the amount to be used for every 30 (thirty) days. Thus, each dispensation must be carried out so that the drug is sufficient for 30 days of treatment in the heart, being also allowed to dispense all medication in a single service, that is, the sale of the entire amount for use for 90 days. If you want to buy enough for one month, the patient can make all purchases at the same establishment, the pharmaceutical must retain the second route of revenue in the first service and attest each monthly dispensation on the front (obverse) of both routes. If the patient chooses to buy in another farm or drugstore, with each purchase the pharmaceutical should check that is for a prolonged treatment (cake art. 80) and that there has already been a previous sale. You should then make a copy of the patient's path and attest to the new attendance on the reverse of both pathways. 8. Electronic scripture in SNGPC According to Normative Instruction no 01/2013, since April 16, 2013 the deed of the antimicrobial drug unit must be performed electronically in the SNGPC. 9. Prescription for veterinary use The DRC no 20/2011 does not rule out the prescription and dispensing of antimicrobial drugs of human use for animals. In this way, human rights must carry out the prescriptions in two ways and in compliance with the determinations recommended by the Class Council (CRMV) in respect of the data that must be contained in a prescription of veterinary physician. We stress that for these photos age and sex data are not necessary, since these data are not of interest to pharmacoepidemiological monitoring, foreseen in the DRC no 20/2011, to be performed only with medicines for human use. In the dispensing, the pharmacist must check that this is a prescription for veterinary use (prescribed by a doctor registered in the Regional Council of Veterinary Medicine - CRMV) and to dispense the medicine with the scar of the second route of revenue. The SNGPC is prepared to receive scriptures of prescriptions prescribed by veterinary physicians, for which should not be informed the age and sex data of the patient. 10. The exemption from the need for knowledge and writing of topical drug use containing neomycin According to Art. 1 of the DRC no 20/2011, the admission of revenue and scripture in the SNGPC is necessary for the drugs that appear listed in Annex I of the resolution (Anvisa antimicrobial list) and that are of sale under doctor (with tarja / red strip).according to DRC No. 138/2003, that have about framing the category of drug sales, the products of a neomycin-associated bacitracin basis (with indications that it is not prescribed of prescription, form, Requires that Talia retain its recipe for bookkeeping -to not have SNGPC. Some brands of these drugs are found on the market still with a red stripe on the packaging. However, its adequacy 'aʋʋʋʋʋʋʋʋʋʋʋʤ Mande160; Anvisa, which occurs every five years. Error of access to the SNGPC at the time of user verification Some companies are encountering an error in the access of the responsible, even though everything is correct with their registration and profile attribution in the SNGPC. This error in access is occurring punctually with some companies and the information area of Anvisa is working on its solution. The error Is © noticed when the RT tries to access the SNGPC and appears the message: "It was NOT POSSIBLE TO AUTHENTICATE MANAGER / USER, POSSIBLE PROBLEMS: E-MAIL RARELY APPEARS IN THE DATABASE OF ANVISA â Since this denial of access occurs by error in anvisa's database when validating the user's data, we remind you that according to Article 6 of the Normative Instruction no. 11/2007 the establishment should not be fined due to the failure of the system maintained by Anvisa. However, © important that the pharmaceutical company contact Anvisa, through the Call Center (0800-642-9782) or link afale conoscoaf and save the registration in case of inspection. RDC 20/2011 complete, but its definition is due to the technical note © in the previous peaks. We make available here, the DRC Surveillance Agency, approved by Decree no. 3,029, of April 16, 1999, and tend in view of the provisions of item II and the 1st and 3rd of Art. 54 of the Bylaws approved pursuant to Annex I to Ordinance No. 354 of ANVISA of August 11, 2006, republished in the DOU of August 21, 2006, in a meeting held on April 27, 2011, adopts the following Resolution of the Collegiate Board and I, The Chief Executive Officer, determine its circulation: CHAPTER I: FROM THE ARCHITECTURE Art. 1ST This definition defines those manufactured for prescription, dispensation, control, packaging and other medicines based on substances classified as antimicrobials of use under symptoms, essays or association, conform Annex I of this Unique Graph Resolution. This problem also applies © to The © ©, the and the antimicrobial substances contained in their Annex I. Art. 2. Private references and drugstores, as well as the municipal, state and federal discharge units that provide medicines through reimbursement, such as the units of the Popula Program of Brazil, dispense with the medicines containing the substances listed in Annex I to this Resolution, 3° Municipal, state and federal dispensation units, as well as the registrations of hospital or other units of equivalent © units, public or private, which do not market medicines must maintain specific prescribing and dispensing control procedures medicines containing antimicrobial substances. CHAPTER II: FROM PRESCRIPTION Art. 4Nd. The prescription of the drugs covered by this Resolution should be carried out by legally qualified professionals. CAPÄÄTULO III: FROM THE RECIPE Art. 5Nd The prescription of antimicrobial drugs should be carried out on private prescription of the prescriber or establishment of health, there is therefore no specific prescription should be prescribed legiblely, without erasures, in 2 (two) routes and containing the following mandatory data: I - identification of the patient: full name, age and gender; II - name of the drug or the substance prescribed in the form of Brazilian Common Name (DCB), dose or concentration, pharmaceutical form, dosage and quantity (in aràBicos numerals); III - identification of the institution, full address, telephone, signature and brand (stamp); and IV - date of the emiss. Art. 6ú The recipe of antimicrobials is vear-round throughout the national territory, for 10 (ten) days from the date of its issue. Art. 7 º The prescription may contain the prescription of other categories of medicines as long as they are not subject to special control. Single graph. There is no limitation of the number of items containing prescription prescribed antimicrobial drugs. Art. 8Th In situations of prolonged treatment the revenue may be used for subsequent acquisitions within a period of 90 (ninety) days from the date of its emisso 1SD In the situation described in the caput of this article, the revenue must contain the indication of basic use, with the amount to be used for every 30 (thirty) days ç 2ú In the case of treatments relating to the programs of the Health © that require different prices from that mentioned in the guidelines of the program. CHAPTER IV: FROM THE DISPENSATION AND RETURN OF REVENUE Art. 9ú The dispensation in pharmaceuticals and drugstores and pharmaceuticals and private companies will be given to the maintenance of the 2nd (second) route of the recipe, and the 1st (first) route must be returned to the patient. The pharmaceutical company will not be able to accept revenues after the expiration date established under this Resolution. At the time of waiver must be recorded in the two ways of the revenue the following data: I - the date of waiver; II - the antimicrobial; III - the number of the service, on the back of the recipe. Art. 10. The antimicrobial waiver must essentially meet the prescribed treatment, including by means of fractional commercial presentation, pursuant to The RDC Resolution No. 80/2006 or that which may replace it. Art. 11. This Resolution does not imply fences or restrictions on the sale by remote means, and for this reason, good pharmaceutical scums and pharmaceuticals, established in the Resolution of the DRC, should be observed. 44/2009 or the one that will replace it. Art. 12. The revenue must be allocated only once and cannot be used for subsequent purchases, except in the situations provided for in Article 8 of this standard. Single graph. Each time the prescription is met within the prescribed period, the procedure contained in Article 9 of this Resolution must be obeyed within the period of time, the procedure contained in Article 9 of this Resolution, the schedule for the accreditation and bookkeeping of the movement of purchase and sale of the drugs subject to this no National Controlled Product Management System (SNGPC), as established in The Resolution of RDC No. 27/2007 or that may replace it.
