Take advantage of the technology at your fingertips and keep your Samsung Smart TV software up to date. By doing so, you can ensure a seamless and enjoyable viewing experience, explore new features, and stay connected to the latest advancements in the world of home entertainment. You may have a bad experience watching your favorite shows if your Samsung TVs sound stops abruptly. Most of the users reported that they faced this issue while they were using external speakers. Fortunately, this is a solvable problem, and you can get your TVs sound back after minor tweaks. If your Samsung TV has almost no sound, it is usually due to a hardware failure. Having said that, we can not overlook the software issue while they mere using external speakers. This article will guide you through the causes and fixes you can apply when your Samsung TV sound is not working. Here are some probable causes why there is no sound on your Samsung TV:Wrongly set sound output modeIncorrect regional settingsLow Signal to Noise RatioMisconfigured Expert settingsOutdated TV firmwareFaulty sound module Fixing the Samsung TV no sound issue is a pretty easy job unless there is a failure in your TV sound module or speakers. You can apply some general fixes before moving to the fixes section. Restart Your TV: Restarting the TV sound module or speakers. without further hassles. It flushes the glitches that are possibly interfering with the sound. Try Channels: The TV channel you are watching may not have a sound. So, before you misinterpret it as an issue with your TV, change the TV channel and see if the issue persists. Check the Volume Levels and Mute Status: Your TVs volume levels may be too low or muted. So, take your remote and unmute the TV or increase the volume all the way up to the audible level. Try Swapping the External Speakers: The external speakers you are using with your TV may themselves be faulty, and you may run into a problem. Connect those speakers to other devices to determine if they are the culprit. Also, check the audio cables for wear and tear. Now that you have applied the basic fixes, its time to get into the more specific fixes. Samsung TVs integrate a diagnosis module that helps diagnose different components like pictures, videos, and sounds. You can use this diagnostic tool to check if there is any error with the built-in sound system on your TV. Follow the steps below to run a sound test on your TV: Grab your Samsung TV remote and tap Menu or Home button on it. Then open Settings > All Settings. Navigate to Support > Device Care. Under Self Diagnosis, choose Start Sound Test. Running a sound test will play a sound test will play a sound test on your TV. If it plays without any issues and distortion, you can be sure your TV speakers are good. You can set the preferred sound output device on your Samsung TV. If you have external speakers, you need to set it as default. If you used external speakers previously and now want to switch to the TV speakers, you need to change the output mode manually. Moreover, there may also be a problem with your external speakers and check if they are faulty. Heres how: Take your remote and press Home button. Open Settings. Then select Sound > Sound Output. Choose TV Speaker from the options. It will start outputting sound through the built-in speakers. Samsung TVs offer a flexible feature that lets you customize the sound depending on your hearing preferences. But, if the set customizations settings are misconfigured, you may have a problem. Balancing and equalizing the sound is possible via expert sound settings. You can set the input and output audio format from here. Most of the time, an incorrectly set format prevents sound from your TV speakers. Follow the steps below to change the audio formats: Open Settings. Change the current input and audio format. If you are unsure which one to select, you can try the hit-and-trial method. Once you figure out the correct settings, you should no longer face a problem. If you mess up the expert sound settings, you can also perform a sound reset. To reset the sound settings, simply choose Reset Sound under Expert Settings. If you are not getting sound from your TV, the cable operator itself can be the culprit sometimes. The quality of the expert Settings is a problem. If you are not gettings is a problem of the expert Settings is a problem. If you are not getting sound from your TV, the cable operator itself can be the culprit sometimes. TV signal it transmits may be too low to produce a sound, and you may face the issue. You can contact your cable operator and ask to look into it if that is the case. Heres how to check the signal information on your Samsung TV: Navigate to Settings > Support > Self-Diagnosis > Signal Information and look at the Signal to Noise Ratio (SNR). If it is lower than 20 decibels, you may not get proper sound on your TV. Dont hesitate to get in touch with your operator and sort out the issue. The next possible error is the incorrectly set language or region on your Samsung TV. Depending on where you live, cable operators use different video standards to broadcast TV signals. The most popular ones are PAL and NTSC. But there may be other standards available as well. Incompatible settings may leave your TV with no sound. Heres how to change the region on your remote serially: 2,8,9, Fast Forward, region and tap Next.Agree to the T & C on the next page.It will take a while to set up, and you are done. Next, check if you are getting sound on your speakers. If your are getting sound on your speakers. If your are getting sound on your speakers. If you are getting sound bring the sound back. Resetting your TV to factory settings is the ultimate fix if any fixes do not work for you. It will help revert every change you made to the TV that may be probably causing issues with the sound. Please ensure you create a backup copy of your TV data since a factory reset. Open your home screen and go to Settings in the bottom left. Choose General > Reset. You may need to enter your TV will restart, and you need to configure it from scratch again. As we already mentioned, there may also be a sound module or speaker failure on your TV; repairing it yourself can be cumbersome. However, if you can manage to dismantle your TV, you can check if your speakers are damaged or not. If not, you can seek professional assistance from Samsung support at any time and get your TV repaired. If you are still under warranty, you can even claim a new TV in case of a major hardware failure. Wondering how to keep your Samsung Smart TV running smoothly and up-to-date? Updating your TVs firmware is essential for enjoying the latest features, improving performance, and ensuring security. For some of the major changes and updates based on the One UI rollout, see below. It's worth noting that these updates may vary by model, region and more. SamMobile shows that the One UI rollout, see below. It's worth noting that these updates may vary by model, region and more. SamMobile shows that the One UI rollout, see below. update is being implemented on Samsung's TVs - including its own 2023 S90C. (Image credit: Sammobile)As for the changes the One UI software update has made on the 2023 TVs, some key features include For You, Live and Apps tabs on the home screen something 2024 Samsung TVs already have that tailor recommendations based on recent viewing, as well as the inclusion of the Daily+ Hub for lifestyle management and health apps, similar to Samsung's super useful Game Hub.Sign up for breaking news, reviews, opinion, top tech deals, and more. There's also a new 'Watch Later' tab where users can save TV shows and movies to a list to watch at a later time. There's a design change to the Game Bar to the latest version, too. There's also fitness improvements, as real-time data such as heart rate and calorie consumption can be tracked when you connect a Samsung Galaxy Smart Watch, such as the Samsung Galaxy Smart Watch Ultra, which we rate as one of the best smartwatches. There are also app widgets and animation changes made to look and act like the One UI software in terms of design. Samsung's aim with bringing the One UI software to its TVs is said to be an attempt to unite all its products into one family, further expanding on its current SmartThings technology. But is this good news for Samsung TV owners? One UI reservations. Samsung's phones, we have been critical of its less than user-friendly approach. (Image credit: Philip Berne / Future)We've previously mentioned our reservations about the introduction of One UI to TVs as a regular criticism we've had of the One UI software in the past in our reviews of its phones is that its too overcomplicated, often hiding features that should be easily accessible. While we have no qualms with Tizen as a smart TV platform, and have in fact praised its improvements over the years with the most notable being the 'hub menu' system, we've never found it to quite beat the likes of webOS, Roku TV and even Google TV in this year's sets, finding Tizen isn't as user-friendly. So if One UI is something we've been critical of for not being user-friendly, is adding it to a smart TV platform that we've not found as user-friendly as rival smart TV platforms a step forwards or backwards?We're still in the very early stages of this rollout so we'll have to see how One UI fares on the best Samsung TVs here's hoping it's a long-term improvement. You might also like Step 1. Navigate to and select All Settings, then select Support, then select Software Update files. Step 3. Allow the TV to check for updates. Step 4. Select Upgrade Now. Step 5. The upgrade will take at least 10 minutes to complete. Then the TV will automatically restart. Step 6. Please wait a few moments for the upgrade to complete. Step 7. Select Get Started.
