Install an older version of Firefox

Often when there is a problem with a Firefox update, people look for a way to go back to the previous version. That usually doesn't solve the problem and will make your computer and information vulnerable to attack. This article gives you some alternatives to downgrading and links to old versions of Firefox if you do choose to downgrade.

Installing a previous version doesn't fix most problems

Problems with an update are generally not caused by the new version of Firefox, but rather the update process. Installing a previous version will not help in most cases. Instead, see:

How to fix the Update Failed error message when updating Firefox.

Version 51.0.1, first offered to the users of the release channel on January 26, 2017 We would also like to extend a special thanks to all the new Mozillians who contributed to this release of Firefox! Page 2 Version 51.0, first offered to the users of the release channel on January 24, 2017 We would also like to extend a special thanks to all the new Mozillians who contributed to this Firefox release! Page 3 Windows XP SP2 Windows Server 2003 SP1 Windows Vista Windows 7 Windows 8 Windows 10 Please note that 64-bit Firefox is only supported on Windows 7 and above. To install Firefox on a Windows XP system, due to Windows restrictions, the user will have to download Firefox 43.0.1 and then upgrade to the current version. Since Firefox 53 scheduled for April 2017, Windows XP/Vista/Server 2008 are no longer supported. These users must migrate to ESR 52 once available (scheduled for March 2017). Recommended Hardware Pentium 4 or Newer Processor Supporting SSE2 512MB RAM 200MB Hard Disk Space Mac OS X 10.9 Mac OS X 10.10 Mac OS X 10.11 Recommended Hardware Macintosh Computer with an Intel x86 Processor 512 MB RAM 200 MB GNU/Linux Hard Disk Space Software Requirements Please note that GNU/Linux Distributors/ Linux can provide packages for your distribution that have different requirements. Firefox will not run at all without the following libraries or packages: GTK+ 3.4 or higher GLib 2.22 or higher Pango 1.14 or higher X.Org 1.0 or higher (1.7 or higher recommended) libstdc++ 4.6.1 or higher For optimal functionality, we recommend the following libraries or packages: NetworkManager NetworkManager or higher DBUS 1.0 or higher GNOME 2.16 or higher EXCELLENT User Rating Coupon Search Plugin for Firefox, find some of the best discounts and deals around the best retailers on the network, discount codes and more. Launched by the Mozilla Foundation in 2003, the open source program has undergone several changes in name, elevators and updates to become the class software that is today. The WEB browser with Advantagethe key to the American company behind Mozilla's suite already had a browser running in 2002, but they wanted to escape from Netscape's sponsorship restrictions. Originally called Phoenix, the brand changed to Firebird and then Firefox in 2004 to avoid brand claims. Since then, it has become one of the most popular browsers in Windows 11, 10, 8.1, 8, 7, Mac, Linux and mobile devices. Executing 32-bit systems, Mozilla Firefox updated to a 64-bit bit MSI Package for Windows in 2016. The main advantages include enhanced download protection, process separation and specific customizations in the web browser. While you can use the interface bar as a search engine, Google appears as the default value. The attractive and attractive theme attracts most people who use the platform and ease of use and the minimum menus are some of the best benefits. Firefox speed rivals some of the best browsers available, using less memory and other Windows resources. However, it is what it lacks, however, they are advanced tools for developers. Firefox and security protocol of the biggest concerns for anyone using a browser is if Mozilla Firefox is safe to download and use. In 2019, the German Federal Office for Information Security called it the safest web browser among any available worldwide. Of all the analysed characteristics, the certificate listFirefox confidence came out at the top. The platform also has strong privacy protocols for 32-bit and 64-bit operating systems, protecting your PC from tracker cookies. Certificates passed both verification tests for the list of certification revocations and the status protocol of the online certificate. In addition, Mozilla Firefox presents presents Color icon and signal for whether a site is encrypted or not. To broaden more the Firefox security features, it has high HTTP voltage transport security and is compatible with the same source policy. There is a password manager to keep all your data safely in one place and you will receive regular updates to ensure optimal performance. You can also block and delete cookies, and delete the history of your browser if you want. Register for a Firefox account While you will receive the basic services when using the Web browser, there are specific advantages to create a Firefox account. The most important of the list is Firefox Sync, which allows you to access your account data on any Windows device. There is also the Pocket tool that saves different web pages to your read list based on your preferences. If you like to help other members with program problems, having an official account gives you the opportunity to answer the help questions. You can also synchronize the notes you have made for easy access on the desktop and the móvil. To improve safety, you will be able to monitor any data default information. The Firefox account allows you to see the content in Fire TV receiving tabs from other Windows devices. If you have installed add-ons and topics for your web browser, the only way to save it is with a registered account. Comparison with other Windows browsers When someone talks about the search of quality Internet, Google Chrome quickly happens to me. He agrees with Mozilla Firefox at speed, beating slightly when it comes to a desk. This last wins the fight with performance when opening several tabs since it is not so hungry in resources as Chrome. Microsoft Edge is another leadership competitor in the industry, designed and built for the Windows environment. Is Internal web browser that receives updates when the operating system does. However, since Edge is still relatively new, it has a long way to reach the massive market and security features of Firefox. Finally, many businesses have acclaimed acclaimed As one of the most innovative navigation platforms. Its instant search function and advanced tools are based on Chrome's success. Opera's latest features have set the benchmark for others, including a Crypto wallet, Web 3 support and a VPN service for additional online security. Another option is to give the chance to avast Secure Browser. How to download and install Mozilla FirefoxDownloading The software is easy and effortless. When you open it, you'll need to indicate where to install the program. You will not be able to sync your files with your Firefox account until after the browser is configured. The main fail is that you will need to spend a while after the installation that works through all available options. However, it is better to do so to ensure that advanced security measures are introduced. Once installed and running, you can click the Menu tab to view all the privacy and control settings. Web navigation security in Windowsmozilla Firefox has travelled a long way since its days as Phoenix and Firebird. It has strong security systems to protect your privacy and passwords, claiming the title as the safest browser in 2019. You can also access additional tools and settings with a registered account. Of all its features, its performance stands out above the rest. Speed is the result of needing less resources, unlike other browsers, which gives you a better experience. It also hosts several new updates, such as blocked cryptom notifications, improved alerts and extended support release updates.
