When we open the esp scope, you cannot see the players clearly, it is big and we see the players by freezing, and I did not notice that the software is 6 hours long. I went to work and when I came back, my license had expired. I thought I bought it because it was 1 day, but 6 hours is too little, I could not even play it fully, (but I liked it, there is no ban) 06/17/2025, 15:14 #6 elite*gold: 26751 Join Date: Oct 2019 Posts: 256 Received Thanks: 18 Quote: Originally Posted by canvasquez The software is good, I could play for 30 minutes in total, I want to share my own experiences. There will also be new programmers in the project. The process of rebranding and transferring all the data will take time, so please be patient. You may have to change the keys, be prepared. At the moment, I can only write that no one will throw anyone. Anyways, when everything will be done, we will transfer all keys to new system or give new keys as replacement. Icons are "scuffed" cause it has screenshot protection, it will come back after 5-10mins after rebooting please don't give a false review the only thing is that AMD which is supposedly "supported" isnt either den that its a decent cheat with a spoofer although the update times are kind of bad. 08/19/2022, 07:28 #99 (?) elite*gold: 0 Join Date: Feb 2021 Posts: 3 Received Thanks: 3 It's not detected. Today, I bring you this lovely grab pet I created for Silkroad a while ago. I also added some skill and sound effects while I was learning about it. Everything client side is there, I'm pretty sure you'll find out the way to implement it on your client. Preview Are you wondering, how I did it ? Everything like npc, monsters and bosses are pretty similars to make. Just take a look to my stream 4k HD Quote: I found it is the small everyday deeds of ordinary folk that keep the darkness at bay.
