As an active player of this game, I can honestly say that it is the best-mounted mobile basketball game I've ever played and is definitely one of my 3 favorite mobile games. The game makes it very easy to get a decent line without winning DINHEIRO in the game and the gameplay is phenomenal!!!! But for the game creators (if you read this) I have some problems with the game from time to time my game freezes randomly during a match and I end up losing the game, please run it or find a way back to the game so I don't automatically lose the game (it's not my wifi connection). I also have two suggestions for the game that Iran would certainly make this the number one game on the App Store. If you added a MyPlayer feature like the real-time console or player game versus player where live nba players could play with their real-time friends, either online or if they were sitting next to each other. These two things would be amazing for the game, but I love this game and I love what the creators are doing with this season 3 has been amazing and I hope the creators will never do another season 2 but I'm excited to see what they will do with the season 4. You will download NBA Live Mobile!!! To this game a review of 5 stars, but the fact that, just have a lot of flaws. © irritating, I just got the game and I can already get frustrated by the insects and slide to the beginners to another team or you can hit, but the team that scored will get the ball or another example © when I can sometimes have a perfect open shot with a player who has a third pointer that is © At least 89+ and still lose, but sometimes can beat up © Even a dog The developer, Electronic Arts, has indicated that the application's privacy practices may include data processing as described below.
