ProSafe® 16- and 24-port Gigabit Ethernet Switches 10/100/1000 Mbps
JGS500 Series

Data Sheet

NETGEAR's JGS500 Gigabit Switch Series gives your office network a megaboost of speed and capacity that is within your budget. With up to 48 Gbps of bandwidth, these 16- and 24-port switches can blast 2000 Mbps per port while their affordable prices enable you to put them everywhere. Use it to take Gigabit Ethernet directly to the desktop! Standards-based for easy integration of 10-, 100-, and 1000-Mbps devices, these unmanaged, rack-mountable switches feature 10/100/1000 automatic speed and full/half-duplex sensing plus Auto Uplink™ on every port. Users can take advantage of the their ability to deliver large amounts of multimedia, image, and video information in no time at all. Ideal for workgroups, labs, departments, or growing offices looking for outstanding performance at a low price.

High Capacity

1000-Mbps speeds and a switching capacity of up to 48 Gbps meet the performance needs for even the most bandwidth-hungry applications. The JGS500 series are perfect for graphics, multimedia, and other applications that have to move large files across the network quickly.

Affordable

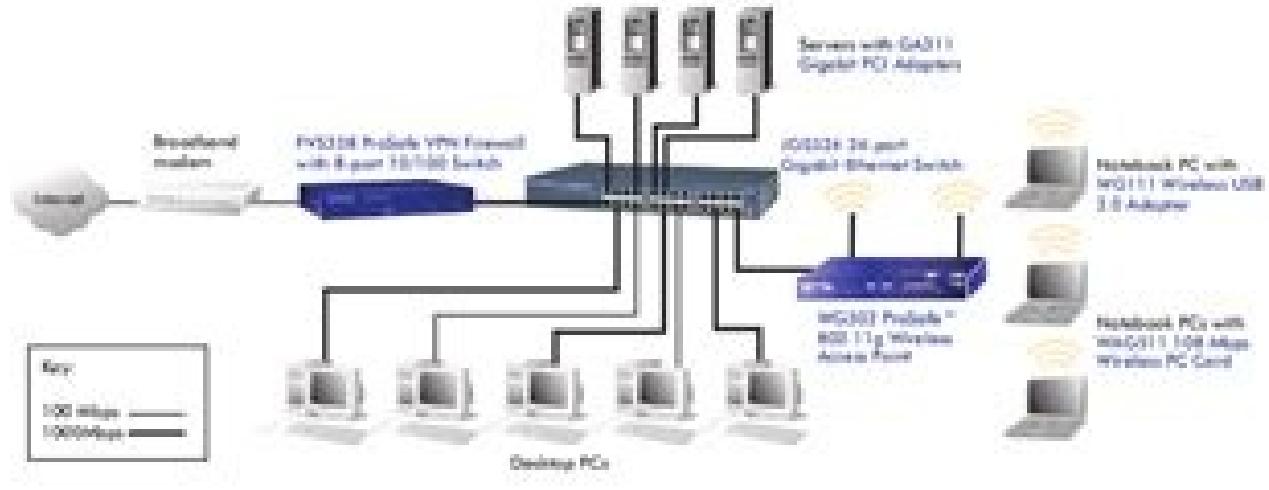

Aggressive prices enable your workgroup, department or small network to ramp up to Gigabit speeds, even all the way to the desktop.

Flexible

Each port is equipped with automatic speed and duplex sensing, plus Auto Uplink to adjust for straight-through or crossover cables to make the right link. Standards-based design makes it easy to combine 10-, 100-, and 1000-Mbps devices on your network.

Convenient

Easy to set up and easy to use, these unmanaged switches have per port LED's for effortless network monitoring. They are compact enough for the desktop but come with a rack-mount kit. They are also compatible with PC, Macintosh, Linux, and Unix operating systems.

Netgear ProductNETGEAR Smart SwitchesProSafe GS108T 8-Port Gigabit Smart Switch Jil35; GS108T-300NASOur Price: \$86.39 8/1000 ports Advanced features: 802.1x, ACLs, Rate limiting, DSCP/TOS-based prioritisation, IGMP Snooping, SNv2, RSTP Easy to manage through © web-based GUI s, joining the NETGEARROS Ahem family of Gigabit Smart Switches with web-based management, this Gigabit 8-port switch © of high value and capacity. With 810/100/1000 Mbps ports and Jumbo frame support, capable of feeding 2000 data Mbps produced in full duplex mode by port, o © ideal for small desks or extensions and connects high-speed servers or energy users. Ideal to combine 10, 100, and 1000 Mbps devices that deliver autonomic speed and full sensing/halfduplex sensing more Auto Uplink in each port. Hello. © m o f this, an intuitive web browser interface offers the management of Smart Switch simple, making it easier to set up doors and set up trunk, VLANs and traffic priority or monitor the switch performance. Alternatively, use SNMPbased software to manage your Smart Switch. The GS108T is equipped with highly advanced resources, such as Access Control Lists (ACL), 802.1x authentication port a, improved Qs, rate limitation and IGMP Snooping, among others, to provide a small and hand © company day with a network that is © growth oriented, while providing scalability and reliability. Security Refrain These switches also © m provide advanced resources that provide more robust security to SMB. These include: 802.1x for authentication, with Guest VLAN MAC security portfolio Improved Quality of service Line Priority ensures three high priority traffic © delivered efficiently, even during high traffic congestion. Companies that run network telephony or video conferencing, for example, need be able to give priority to this traffic of voice and video and other real-time applications on any less sensitive traffic to latency to ensure reliability and quality. The ability to prioritize traffic quality of services and sensational applications to the system, despite the increasing loads of traffic. The ProSafe GS108T provides several advanced QoS features: 802.1p based on layer 3-based prioritization (DSCP), which limits the rate of Priority Technology Characteristics Manage all ProSafe Smart Switches from a easy-to-use Web console that can be used to configure all features, as well as to monitor and troubleshoot problems. These switches© also have SNMP (v1, v2c) to collect and track data to monitor network health, as well as to manage devices, and more easily apply critical IT controls and policies. SNMP v2c is © most commonly implemented as it provides better reporting capabilities than SNMP v1. In addition©, the GS108T© also supports standards based on 802.1ab: Link Layer Discovery Protocol (LLDP). This feature allows the discovery of other devices on the network that support LLDP. The switch also © the Link Aggregation Group (LAG) that allows the creation of trunk groups. Finally, the GS108T© also features the 802.1w Rapid Spanning Tree (RSTP) that is © compatible with the 802.1d Spanning Tree protocol. These ProSafe Smart Switches provide world-class reliability with a limited warranty and optional ProSupport maintenance packages. These switches work with other SNMP-based management software.
