Sql exclude null

Sql count exclude null. Sql min exclude null. Sql order by exclude null. Sql exclude null values. Sql exclude null rows. Sql group by exclude null. Sql max exclude null. Sql count distinct exclude null.

Riley replied - Nov 29, '16 MINO ignores null values, then the only way to get min(dob) to return a 'null' if all the values of 'dob' are 'null'. - 3 comments ThomasRushton responded - Nov 29, '16 If you're seeing that, then you might try SELECT MIN(DOB), MAX(DOB) From the customer WHERE DOB IS NOT NULL But, if the database server is not SQL Server, then I don't guarantee that the code will work. :-) Watch this new video on YouTube The SQL Server FIRST_VALUE feature makes it easy to return the "first value in an orderly set of values". The problem is that if that first value happens to be a NULL, there is no easy way, integrated to jump it. While a UserVoice element exists to add the help to ignore nulls (go vote), today, we are going to realize that final result with some alternative questions. The setup The example data will be ignored: CREATE TABLE #Data (Id int IDENTITY(0,1), GroupId int, Value1 int); GO INSERT INTO #Data VALUES(1,1), (2,1), (3,1), (4,1), (5,1), (6,1), (7,1), (8,1), (9,1), (10,1), (11,1), (12,1), (13,1), (14,1), (15,1), (16,1), (17,1), (18,1), (19,1), (20,1), (21,1), (22,1), (23,1), (24,1), (25,1), (26,1), (27,1), (28,1), (29,1), (30,1), (31,1), (32,1), (33,1),
