## I've been having a thing for Ray Dalio lately. IT'S $\ensuremath{\mathbb C}$

much so that some call it a cult. For me, that's © just talk. It has a very good organization, and there is much we can learn. Here are some of the most interesting and non conventional ideas for success, directly from Dalio. People should always make adjustments based on what they learn PrincÃpios, he preaches for superiors to embrace constructive criticisms, and to use blunt and honest criticisms to grow. Ã Ã Josiat160; Bridgewater criticize this arrangement, saying that workers did not always feel heard when expressing their criticisms. Despite I think it's fascinating that someone so powerful how much Dalio it is ... It is not possible, non - It is not possible, non of it. her. in order to make honesty more of a double hand path, © have "hard love". Dalio encourages all employees to have a sense of healthy humility, and to make changes internally in response to the critical. "Hard love" should not be strict or without any: It should build a culture of introspection and self-perfection. He advocates putting his genuine thoughts on the table and discussing them so that © no one is secretly angry with each other. Despite defending gross honesty, Dalio does not severely penalize employees for making mistakes. On the contrary, he says they are teaching opportunities. The eighth of Dalio's first says that there is no problem in making mistakes, but there is no problem in failing to learn from them. He recognizes that "effective and innovative thinkers will make mistakes," and believes they are part of the creative process. The beginning of 20Th says to "constantly get in sync about what is © truth," Dalio says the key is © communication open in the workplace. Everyone always has the right to ask questions, but © to earn the right to have an opinion. He says to have an open mind but at the same time assertive and embrace the concerns of others. It encourages open disagreements at work, especially when between "two or more caring people" there is a consistent message about self-reflection in these beginnings. In a competitive era of wanting to do better than anyone else, it can be difficult to swallow your pride and examine your flaws. However, this is © what Dalioà says to do if you want success. Self-reflection is © for everyone, even the highest. It is a highly © way for people to recognize when they should make changes, in themselves or in others. Dalio © a believer in emanation the differences between people. They all bring unique values, values and capabilities. The only way to know what to expect from a Wow. © Know. It encourages employees to identify differences. These differences are the key to assigning the right people to the right responsibilities, and encouraging employees to explore unique paths. It's true that not everyone likes Dalio's ideas. There are many organizations with a structure much more from top to bottom. It is often necessary, depending on the business. However, there is a lot of emotional intelligence for what Dalio is preaching. When workers are allowed to express themselves more, and they know that one can really hear it, this can result in all kinds of benefits, from a greater permanence of the workers to a higher quality effort. If you take these keys to success, you can simply turn your company. The Racheal Ray Show is popular for its fun host and the tasty and affordable recipes.
