I'm not a robot

Impired to box with low specs and is recommended for those with a tight budget. Having powered by a rock chip RK3229 processor and Mali 450MP GPU this android tv box is suitable for basic online streaming like YouTube or Netflix. Although it supports up to 4k resolution it can show some lag while playing 4k videos. However, for a basic Android television experience, this Android TV box is surely ok to purchase. SPECIFICATIONS Warranty: 7 Days Replacement Warranty And 1 Year Service Warranty And 1 Year Service Warranty. Brand: OTT TV Box Model: MXQ PRO 4K 5G (Update Version of MXQ PRO 4K) RAM: actually 1GB RAM and you can test it yourself by installing CPU-Z or any other benchmarking apps from google play store) ROM: Actually it has 8GB internal memory (some fraud sellers change the firmware and declare it 64GB or 128GB but it is actually 8GB ROM, you can test it yourself when you copy in large size file) Processor: Rockchip RK3229 GPU: Mali 450MP GPU Android Version: Actually it is Android 7.1 (but it shows Android 11) Interfaces: 4* USB, HDMI Out, AV Out, SPDIF Audio Out, Ethernet and SD Card Slot Other Features: 5GHz Wi-Fi, Wireless Screen Mirroring / Miracast, Pre-Rooted, Can Install any apps from google play store, supports official tv apps like toffee, binge, Jago bd, bioscope, etc. Supports Mouse, Keyboard, Webcam, etc. Compatible with any kind of television. LED TV, LCD TV and CRT TV (for CRT television you have to purchase a special 1:3 AV cable and a 3:3 male to male av cable) Be Careful From Fake Models and Fake RAM ROM Specifications There are currently various qualities of MXQ PRO 4K 5G TV boxes in BD, only a few are original. Also, there are some fraud sellers who change the firmware and declare higher RAM/ROM. Remember MXQ PRO 4K 5G is actually 1GB RAM and 8GB ROM, but when you check it with any benchmark app like CPU-Z, you will see that it is actually having 1GB of RAM and 8GB of internal storage. You can also check it very easily by copying any file to the internal memory. While you try to transfer a large-size file, you will see that, although it has been declared 64GB ROM, it cannot even copy a file of 4.5 GB (as because it has actually 8 GB ROM, 3.5GB is used by the system itself). Also, there are some very low-quality duplicate mxq pro 4k 5G tv boxes that have no 5g wifi but have 5g written on the product body and box. This is also an easy way to identify original MXQ PRO 4K 5G android tv boxes. MXQ PRO 4K 5G android tv boxes. MXQ PRO 4K 5G android tv boxes that have no 5g written on the product body and box. This is also an easy way to identify original MXQ PRO 4K 5G android tv boxes. to 2500 Taka. Some sellers declare the true specs and sell it for 1900 BDT. Also, there are some fraud sellers who declare it as a 4GB RAM Android TV Box at the best price. Our price for MXQ PRO 4K 5G tv box in the year 2024 is only 1200 Taka. brands OTT TV Box Please Select RAM/ROM 8G/128G, 4G/32G, 16G/256G The world is moving fast, and this is the age of Kodi. No one likes to wait for their TVs into smart televisions with the help of Android streaming TV boxes. Collecting DVDs is old fashioned when movies can just be streamed. One such device that can make your life easier is the MXQ Pro 4K. The MXQ Pro 4K is a TV box that streams content like a pro. Loaded with amazing features and running on Android 5.1 Lollipop with a quad-core processor, this TV box is incredible. The best part is that compared to its contemporaries, it comes at a low price. Hence, you can run all the programs you like and ditch your cable connection at an affordable price with the MXQ box. Design The MXQ box itself is black in color with the name of the device written on top in white. It's made of plastic, but this plastic is not the sort that breaks with one fall. Rather, it is made of quality material, so it can withstand some wear and tear. The box is square in shape and is not exactly sleek or stylish; instead, it's a bit boring. The black is not glossy but dull. It also has some ports on the back with an antenna. When it is in the package, the product weighs a lot, but when you take out the MXQ TV box, you'd be surprised to notice that it is lightweight. It comes with a sturdy AC power adapter that can be used for other gadgets as well. The remote that comes with a sturdy AC power adapter that can be used for other gadgets as well. The remote that it is lightweight. It comes with a sturdy AC power adapter that can be used for other gadgets as well. The remote that it is lightweight. It comes with a sturdy AC power adapter that can be used for other gadgets as well. HDMI cable, and user guide also come along with it. You can notice that the English written on the packaging of the MXQ box and inside the manual is choppy. However, that isn't a huge concern. The manual has extensive chapters on all the important matters and explains them quite well. MXQ Pro 4k Hardware Specs The MXQ box features a very capable 2 GHz Quad Core processor. This, combined with the Penta Core Mali-450 GPU, gives it plenty of power for most tasks you throw at it. You will find beefier specs on other units. But, certainly not at this price. The CPU and GPU are fast enough to play up to 4K video. Also, you won't have any issues running the majority of games on this set-top box. However, the MXQ does not support Bluetooth. Therefore, ensure that you buy a gamepad with a dongle to connect it to this box. Storage This MXQ Pro 4K offers just about enough space for a streaming device. It has 8GB Flash memory, which means you won't have to worry about running out of storage space when using the MXQ primarily for streaming. You can download as many apps as you like. But, if you are looking to store movies locally, you will run out of space quickly. Since this TV box has a USB port, though, you can store files on an external drive. Hence, with both internal and external storage, you are set for endless hours of entertainment. Additionally, the MXQ Pro 4K also has an external card reader. You can add an SD card of up to 32GB if you still need more storage space. Connectivity The MXQ box supports both Wi-Fi and Ethernet speeds are sufficient for any type of streaming. This device, it's an excellent buy, but if you are on the lookout for something that can support heavy gaming, then this product might not be the right choice. Picture quality that this TV box offers is high end. It supports all sorts of resolutions, 4K and HD videos pose no challenge to it. Crystal clear and smooth picture quality is what makes the MXQ Pro 4K stand out. Additionally, it doesn't waste time buffering. It offers great quality at a great price. And this makes the MXQ Pro 4k such a popular types of audio and video formats. It supports all the common audio formats available from MP2 to MP3 and MP4. Also, you get TrueHD and DTS support to put your surround sound system to the test. Regardless of what video format you throw at it, the MXQ will handle it like a pro. Also, as the device has an HDMI port, it can stream with a clear and crisp picture quality to your TV. Gaming Although you can download as many Android applications as you like, this TV box is more for streaming content than for gaming. There's no Bluetooth availability, which makes gaming a dull experience. As the remote is also cheap, it adds to why gaming isn't as impressive on this device. However, there are quite many games available on it and you can always attach a keyboard or mouse pad with the USB Type-A port that it has. © 1996-2014, Amazon.com, Inc. or its affiliates Image not available for Colour: To view this video download Flash Player MXQ Pro 4K Ultra HD Kodi 16.1 Android TV Box. The MXQ Pro 4K Ultra HD Kodi boxes, the powerful processors bring UHD 4K support at up to 60FPS and with a wide range of formats supported including H.265 / 10-bit HEVC and AVS+ codecs you can enjoy superb movies that take up very little space due to advanced compression methods. A highlight of the 2GHz Amlogic S905 Cortex A53 processor is the Penta-Core ARM GPU which will take command of all the graphical needs and delivers seamless performance for games, movies and everything else you may require with resolutions output at up to 4K (2880 x 2160). Thanks to the SPDIF out-port you can even connect to your speakers and play music independently of your TV from online radio stations, from online repositories or your own media library. There's no need to worry about storage or use one of the 4 USB ports with a USB memory pen, 64GB or 500GB, both available from the options above. With 4 USB ports there is plenty of options for all your peripherals so by adding a mouse and keyboard your are ready for a home computer and entertainment system that will make your TV truly HD smart.Kodi V16.1 TV BoxWhile most TV Boxes support Kodi the MXQ Pro makes your life easier by coming with it preinstalled, with plenty of add-ons already there you just need to plug it, power it up and you can access a world of online media from thousands of channels.
